Address : Chandigarh

Summary

Cloud and DevOps Engineer with hands-on experience designing, deploying, and managing scalable distributed systems on AWS, GCP, and Kubernetes. Skilled in automating infrastructure with Terraform, implementing CI/CD pipelines, and monitoring production-grade systems using Prometheus, Grafana, and CloudWatch. Adept in Python and JavaScript with a strong foundation in system design, networking, and automation. Passionate about improving performance, scalability, and reliability through modern DevOps practices and cloud-native technologies.

Technical Skills

Cloud & Infrastructure: AWS (EKS, ECS, Lambda, CloudFront, Route 53), GCP (GKE, Cloud Run, Cloud SQL), Terraform, Docker, Kubernetes, Ansible

CI/CD & Automation: Jenkins, GitHub Actions, GitLab CI/CD, TeamCity, Bash/Python scripting

Monitoring & Observability: Prometheus, Grafana, CloudWatch, GCP Monitoring & Logging

Programming: Python, JavaScript (Node.js)

Frameworks: FastAPI, Vue.js

Databases: PostgreSQL, Redis (Valkey), DynamoDB

Version Control & Collaboration: Git, GitHub, Agile/Scrum

Other: Kafka, Slack Bots, Infrastructure Security, IaC, RAG (Retrieval-Augmented Generation)

Experience

Cloud & DevOps Engineer | Bebo Technologies

July 2024 – present

Technologies: [AWS, Kubernetes, Terraform, Jenkins, GitHub Actions, Prometheus, Grafana, Python, Node.js]

- Architected and deployed microservices across AWS EKS clusters, achieving high availability and fault tolerance.
- Automated infrastructure provisioning using Terraform modules, cutting deployment time by 60%.
- Designed multi-account AWS networking architecture to support distributed enterprise workloads.
- Integrated Prometheus & Grafana dashboards to enhance system observability and reduce MTTR by 30%.
- Implemented CI/CD pipelines across Jenkins, GitHub Actions, and GitLab, incorporating automated testing and security scans.
- Developed custom DevOps tools — including Slack bots, database dump/restore scripts, and secure .env management — boosting team efficiency by 40%.
- Built a Retrieval-Augmented Generation (RAG) solution for intelligent information retrieval with 90% accuracy.

Full-Stack Developer [Freelancer] | Remote

Feb 2025 – Sept 2025

Technologies: [FastAPI, Vue.js, Kubernetes, Kafka, AWS, Redis [Valkey], PostgreSQL, Lambda]

- Designed and developed an incident management platform with a Vue.js frontend and FastAPI backend.
- Improved system resilience under high traffic by implementing a Kafka-based queuing system with retry and exponential backoff rate limit reduced by 95%.
- Built AWS Lambda functions to synchronize Slack messages with the platform, enabling real-time collaboration.
- Automated data synchronization pipelines using Kubernetes CronJobs, ensuring near real-time OpsGenie updates.
- Implemented multi-tenancy with RBAC for secure, fine-grained access control with Zero trust Policy

Cloud and DevOps Engineer at Envsoft Solutions LLP

August 2023 –

July 2024

Technologies: [GKE, Cloud Run, Compute Engine], Terraform, Cloud Monitoring, Cloud Logging, Node.js, Python]

- Deployed and managed scalable applications on GKE clusters ensuring 99.9% uptime.
- Automated provisioning of GCP resources (VPC, IAM, Cloud SQL, Pub/Sub) via reusable Terraform IaC modules.
- Configured Cloud Monitoring and Logging with custom Grafana dashboards, improving issue resolution by 40%.
-

- Designed CI/CD pipelines for automated testing, vulnerability scanning, and blue-green deployments.
- Built automation tools for Cloud SQL backups, secret management, and developer workflow optimization.
- Actively participated in Agile sprints and code reviews, ensuring consistent release quality. Deployed and managed scalable applications on GKE clusters ensuring 99.9% uptime.
- Automated provisioning of GCP resources (VPC, IAM, Cloud SQL, Pub/Sub) via reusable Terraform IaC modules.
- Configured Cloud Monitoring and Logging with custom Grafana dashboards, improving issue resolution by 40%.
- Designed CI/CD pipelines for automated testing, vulnerability scanning, and blue-green deployments.
- Built automation tools for Cloud SQL backups, secret management, and developer workflow optimization.
- Actively participated in Agile sprints and code reviews, ensuring consistent release quality.

Education

- **Bachelor of Technologies in, Electronics and Communication Engineering** for Guru Nanak Dev University [2023] with CGPA: 8.14
- **Senior Secondary [XII]:** GSSS Ucha, Jalandhar [2019] 90%
- **Secondary [X]:** GSSS Ucha, Jalandhar [2017] — 75%

Projects

Full-Stack E-Commerce Application

Technologies: [Vue.js, FastAPI, AWS, Docker, Terraform, Redis, DynamoDB]

- Designed and deployed a scalable e-commerce application with RBAC authentication and multi-tier architecture.
- Automated provisioning of AWS resources (ECR, ECS Fargate, VPC, ALB, Route 53) using Terraform.
- Implemented caching with Redis and asynchronous event-driven architecture via SQS and SNS.
- Integrated CI/CD pipelines for zero-downtime deployments and proactive monitoring using CloudWatch and Grafana.
- Used AI/NLP for sentiment analysis to improve user engagement insights.

Certifications

- [Oracle Cloud Infrastructure 2025 Certified Foundations Associate](#)
- [Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate](#)

Core Strengths

- Cloud Architecture & Infrastructure Automation
- CI/CD Pipeline Design & Implementation
- Monitoring, Logging & Incident Response
- Distributed Systems & Scalability
- System Design & Networking
- Cross-Team Collaboration & Agile Delivery
- Problem Solving & Continuous Learning
